complex technical  
problem solving

The best approaches  
of the Automotive Industry

KOMPLIZIERTES  
EINFACH  
MACHEN

Using the best combination of 9 methodologies,  
we help you to make your company  
the **LEADER** in your industry

Methodology  
Toolkit

for existing  
processes

for existing  
products

product / process  
innovations

Customised  
combined & adapted  
for your company!

few specialists

all employees

WHAT?!  
easy!

**Achieve breakthrough improvements in projects & workshops**  
and establish a structured & data-driven problem-solving culture

**Complex technical problems**  
Solve quickly & pragmatically with structure, contrasts & simple statistics

**Design new processes & products**  
consistently from the customer's perspective ensuring robust & error-free implementation

**Improve products & processes sustainably**  
with advanced statistical methods

**Creative innovations & process automation**  
generating real added value from customers' perspective

Anchoring **transparency & daily improvement** in day-to-day business

**Value creation perfectly under control**  
from workplace to end-to-end value stream

Methodology  
Toolkit

WHAT?!  
easy!

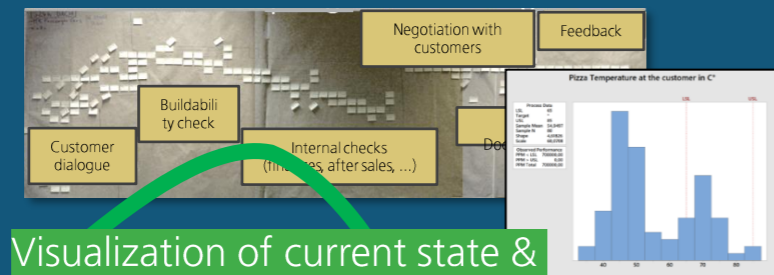

# Fast project success with **LEAN SIX SIGMA & Change**

- ✓ Process stability & quantification through SIX SIGMA
- ✓ Speed & pragmatic implementation through LEAN
- ✓ Acceptance & change dynamics through CHANGE
- ✓ Combining the best approaches to create a data-driven problem-solving culture

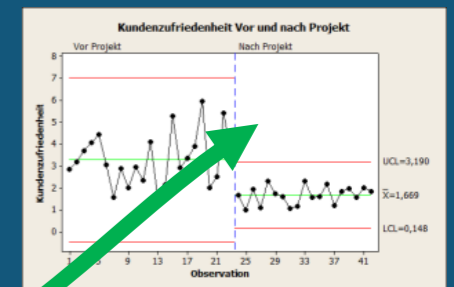

## Example

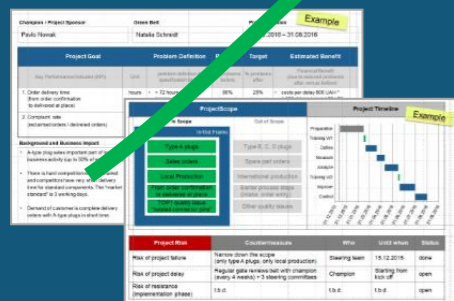

Visualization of current state & quantification of the baseline

Focused implementation on the main causes & levers

Safeguarding sustainability

Definition of pain points, project key metrics & clear project focus

Data-driven analyses to understand important relationships

Proof of effectiveness & quantification

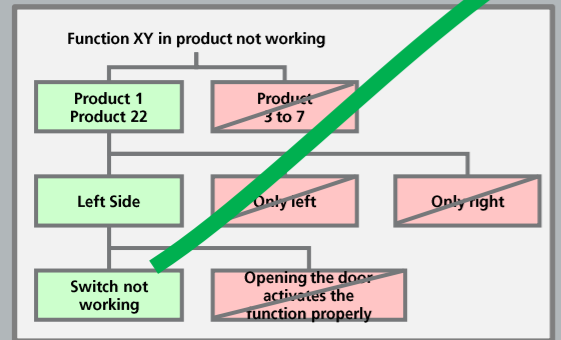

# Solve complex technical problems quickly with 8D + SIX DELTA®

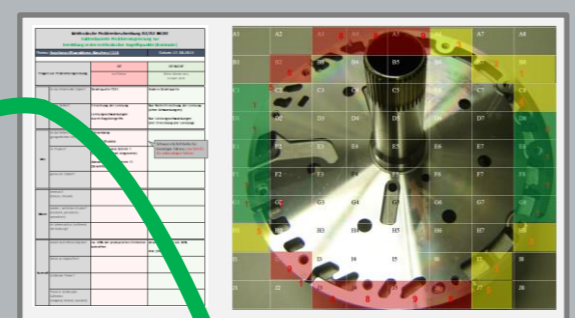

- ✓ Systematically narrow down the problem with facts & differences
- ✓ Find the cause immediately with the help of contrasts & simple statistics
- ✓ Confirm and implement simple & effective solutions without unnecessary detours

## Example

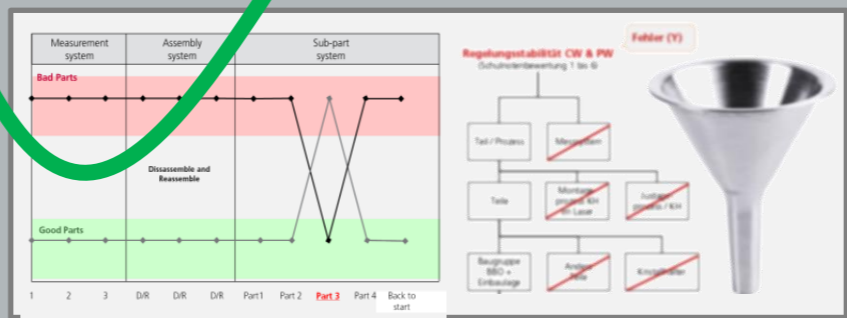

Enable focussed processing of the main error and reduced complexity

Product and process contrasts identified to enable rapid root cause search

Simple tests to confirm the root cause and define optimal product characteristics

Geometry	Unit	Pairing 1		Pairing 2		Pairing 3		Pairing 4		Pairing 5	
		Bad	Good	Bad	Good	Bad	Good	Bad	Good	Bad	Good
Length A	mm	14,77	14,67	14,68	14,71	14,59	14,50	14,57	14,66	14,46	14,64
Length B	mm	0,37	0,98	0,00	1,09	0,22	0,72	0,07	0,79	0,21	0,72
Lengths C	mm	0,00	0,00	0,00	0,10	0,00	0,05	0,09	0,11	0,10	0,05
Angle	°	2,60	0,00	0,00	0,00	2,57	0,00	3,07	0,00	1,07	0,00

Fact + contrast-driven clue generation for rapid & detour-free root cause search

Effectiveness of the solution is proven and stability over time confirmed

# Rethink & improve processes every day with **LEAN MANAGEMENT**

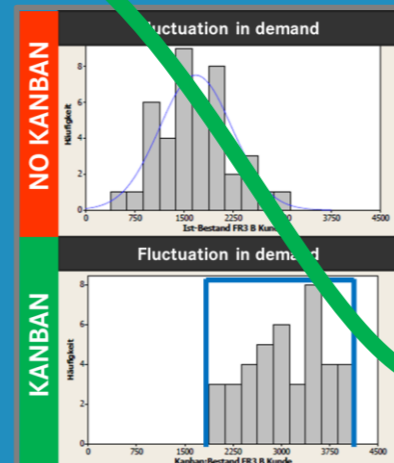

- ✓ Perfect control of the workplace
- ✓ Avoid unnecessary effort
- ✓ Iteratively achieve small & large improvements

## Example

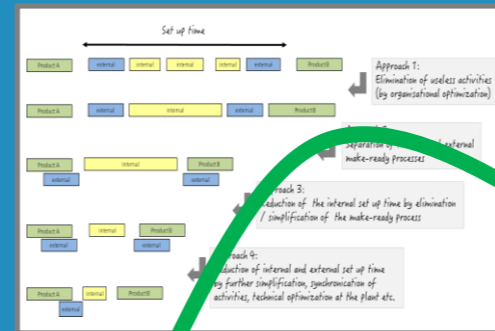

Evaluation & visualisation of the **CURRENT** and **TARGET** state, e.g. value stream analysis

Implementation loop 1 e.g. **KANBAN**

Implementation loop 2 e.g. **SMED & Kamishibai boards**

KPI Tracking for each implementation loop

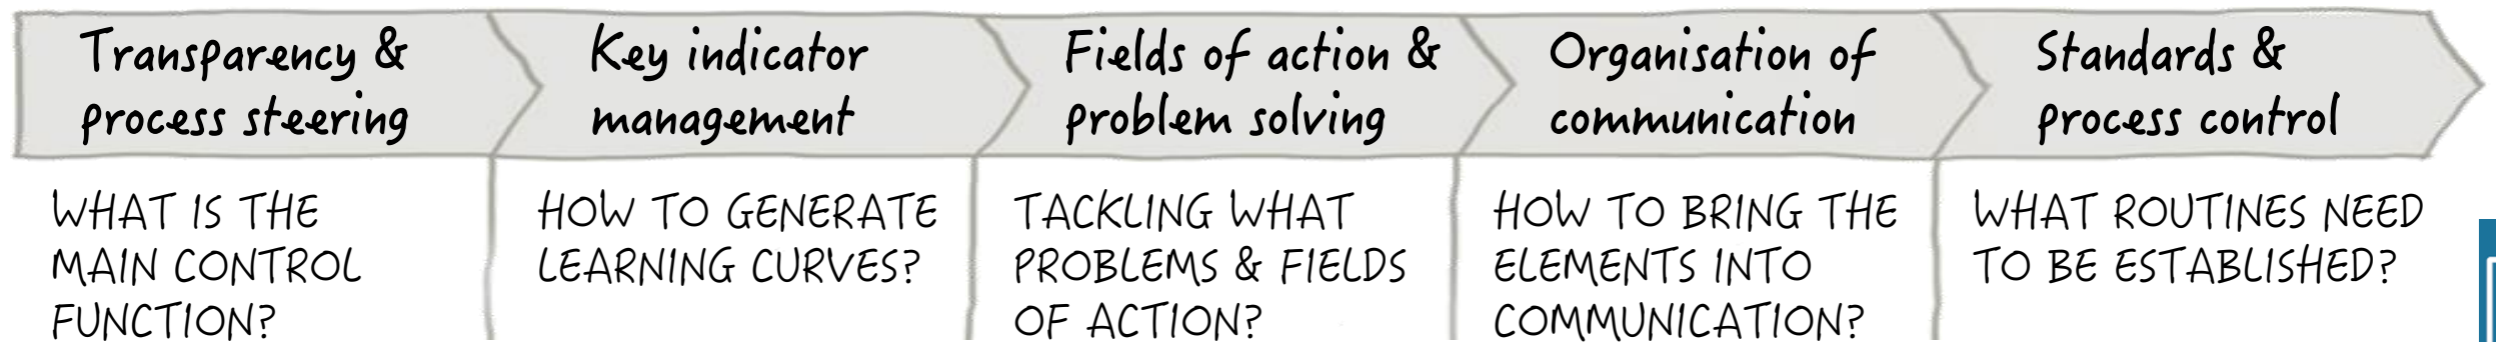

Implementation loop 3 e.g. **LINE BALANCING**

# Control your daily business with **SHOPFLOOR MANAGEMENT**

- ✓ Improvement of operational KPIs, standards, transparency & error culture
- ✓ Short-cycle communication with facts & accelerated problem solving
- ✓ Support for daily improvement work through process proximity and involvement of employees & managers

KOMPLIZIERTES  
**EINFACH**  
MACHEN

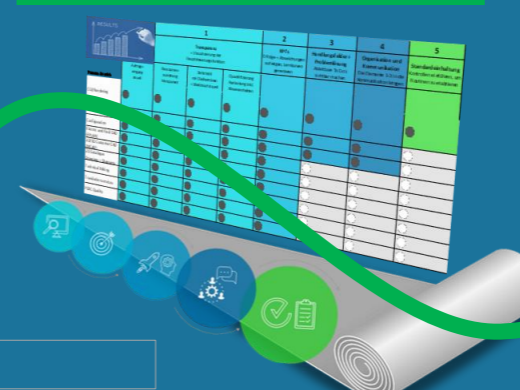

## Example

Daily KPI tracking

Step-by-step roll-out of the SFM & communication elements

Alignment of on-site management to the key requirements of all process participants

		Kapazitätsboard														
		Tage														
		17	18	19	20	21	22	23	24	25	26	27	28	29	30	
Fr. Mayer	Unsub	Rendering 6						RX	RX	R18	RX					
		R16	R1	R17	RX	RX	R5	RX								
Fr. Müller	Rendering 1	R5	R1	R8	RX	Rendering 11										
	RX	RX	RX	R4		R7	RX	R10	Rendering 6							
Hr. Schmidt	R3	Rendering126						RX								
	RX	RX	RX	Weiterbildung			RX	RX	RX	RX	RX	RX				

Implementation of the main control function, e.g. visual capacity control

Continuous optimisation in the ongoing SFM process

# Design new processes & products with **DESIGN 4 LEAN SIX SIGMA** consistently from the customer's perspective & error-free implemented

- ✓ On schedule from customer request to finished product / process
- ✓ Translate relevant customer requirements in a structured way
- ✓ Products & processes robust & error-free right from the start

KOMPLIZIERTES  
**EINFACH**  
MACHEN

## Example

**Goals & Purpose**

**Prioritised customer wishes**

**Step-by-step concretisation**

**Transition to technical design features**

**Finding the best solution e.g. morphological box**

**Customer wishes made measurable, including dependencies**

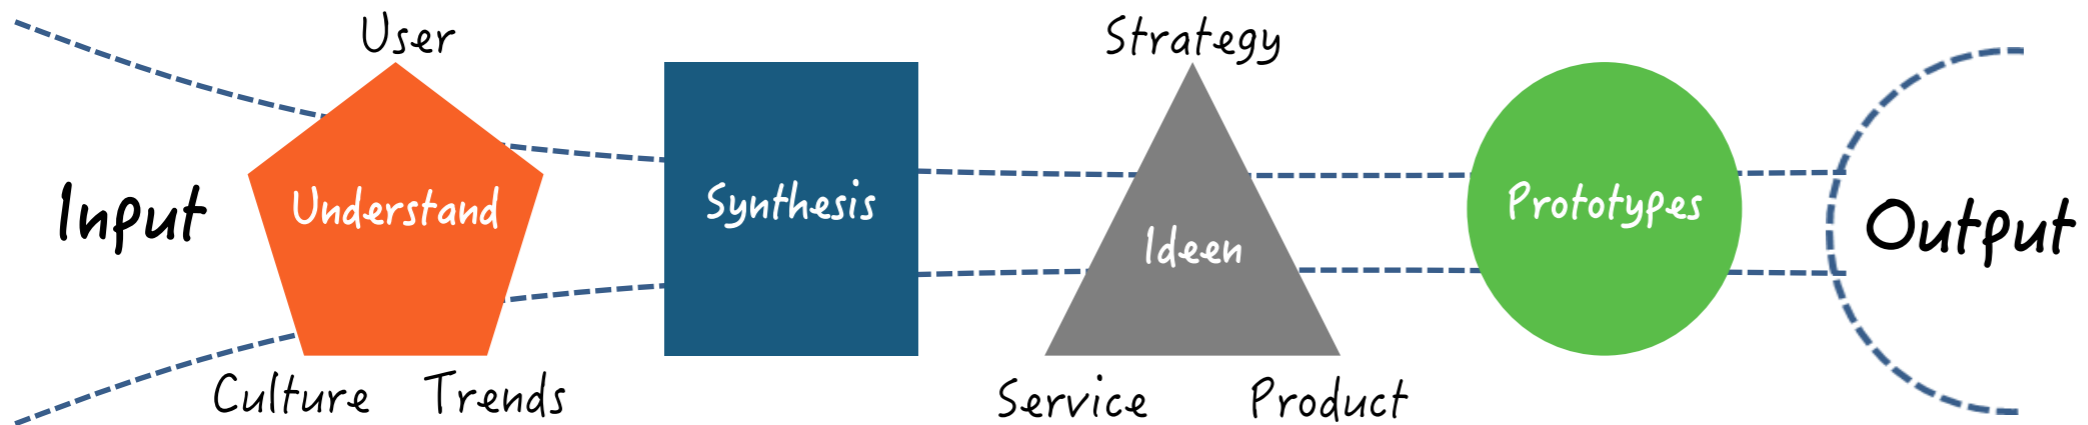

# Recognise & comprehensively fulfil key user needs with **DESIGN THINKING**

- ✓ User-centred solutions that meet the actual needs of users
- ✓ Iterative improvements through feedback & context adjustments
- ✓ Creative problem solving & innovative approaches

KOMPLIZIERTES  
**EINFACH**  
MACHEN

## Example

**WHAT?!**

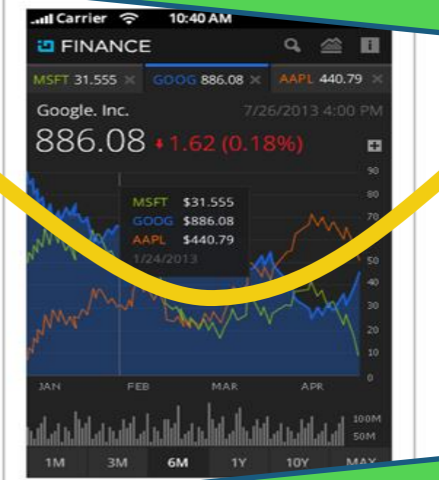

easy!

Understand prototype & concretisation of ideas

Transition to trialling & prototype testing

Degree of concretization of the solution

# With this simple **SELF-CHECK** you will recognise groundbreaking key approaches for your company

How well does your company....

Designing workplaces & value streams to flow perfectly so that work is quick, easy & error-free?

Work on projects in a structured & data-driven way and achieve fast & sustainable breakthrough improvements?

Actively involve all employees in problem solving, process-related improvement and an open error culture in day-to-day business?

To resolve complex technical problems quickly, sustainably and without unnecessary detours to the main causes?

To design innovations & user experiences in such a well thought-out way that they comprehensively fulfil the needs of the users?

Develop new products & processes robustly & consistently from customer's perspective & timely introduction with minimal risks?
